INDEX TO VOLUME XXXVI

[NOTE.—In this index the titles of principal papers and headings of departments, as *Discussions* are in italics.]

Aberdeen, E., on sediments, 795
Abrasion of sediments, 800
Abrasive, Mechanical polishing with a film of (Fuller), 199
Abstracts—
Artesian conditions in the lower Tennessee Valley (Rhoades), 110
Artesian water in the coastal area of Georgia and northeastern Florida (Stringfield, Warren, and Cooper), 110
Autoradiography of ores (Goodman and Thompson), 843
Chromite deposits of the Philippine Islands (Frasché), 845
Correlation of the Bunker Hill and Sullivan fracture pattern with regional stresses (McConnel), 844
Dynamic ore control (Wisser), 106
Engineering geology in the program of the Tennessee Valley authority (Moneymaker), 109
Engineering geology of the Canton Reservoir project site (Burwell and Loughran), 109
Foundation and slope problems at Youghiogheny Dam (Philbrick and Nesbitt), 842
Geology and ore deposits of southwestern Sardinia (Behre), 113
Geology of the nickel silicate deposit near Riddle, Oregon (Pecora and Hobbs), 841
Geology of the Omega mine, Larder Lake, Ontario (Jenney), 107
Gold mineralization in minor igneous intrusions (Moorhouse), 840
Ground-water temperature on Long Island, N. Y., as affected by recharge of warm water (Brashears), 111
Host-rock inflation by veins and dikes at Grass Valley, California (Farmin), 107
Mineralization of the Ajo copper district, Arizona (Gilluly), 847
Abstracts—Continued
Movement of mineralizing solutions in the Picher district, Oklahoma-Kansas (Stoiber), 842
Notes on the origin of the Mansfeld copper deposits (White), 847
Oölitic pyrite, Wabana, Newfoundland (Jobbins), 108
"Opalite" type of quicksilver deposit (Yates and Roberts), 839
Origin of sulphides in the nickel deposits of Mount Prospect, Connecticut (Cameron), 842
Origin of the quartz deposit at Fazenda Pacu, Brazil (Kerr and Erichsen), 845
The place of observational geology: Past and present (Miller), 112
Problems presented by deep solution cavities in dam construction (Moneymaker and Fox), 111
Radioactive aureoles around some ore deposits (Keevil), 844
Relation of geology and physiographic history to water supply, floods, and soil erosion in the Muskingum watershed, Ohio (Ireland), 846
Results to date of exploration for ground water in the buried Genesee Valley (Hoffmeister), 112
Scheelite-powellite minerals of the Seven Devils district, Idaho (Cannon and Grimaldi), 839
Secondary magnetite in sedimentary iron ores (Hayes), 108
Settling of heavy minerals in a granodiorite dike at Bradford, Rhode Island (Quinn), 843
Significant developments in Quebec's mineral industry (Schwartz), 113
Solubility of solids in "gases" or "vapors" (Morey and Ingerson), 845
Some comparisons of Sudbury with the Bushveld Complex (Moore), 106
